### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with G. McFarron on 4-13-2005.

2. The application has been amended as follows:

- Claim 34, line 15, after treatment device; “and” has been deleted; and in line 21 after “subject”, the following has been added: —; and a controller adapted to receive signals from said sensor and control the blood treatment device in response thereto—.
- Claim 35 has been amended as follows:  
—35. (currently amended) The system of claim 34 in which the sensor generates a signal responsive to one or more selected characteristics of the fluid in one of the fluid flow paths, ~~the suspension treatment device including a controller adapted to receive the sensor signal and to control the treatment device in response thereto.~~
- Specification, **page 1**, above the paragraph beginning at line 10, the following has been added: —This application claims the benefit of provisional application No. 60/216,460, filed on July 7, 2000.—; on **page 2**, line 17, “bloods” has been replaced with —blood—; on **page**

Art Unit: 1723

10, line 22, “comprises” has been replaced with —comprise—; **page 29**, line 6, “4,562,416” has been replaced with —5,462,416—; and on **page 30**, line 9, “120” has been deleted.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

- The closest cited art—Mian et al.—fails to anticipate or render obvious, alone or in any proper combination, the microelectromechanical sensor sensing a biological or chemical characteristic of the fluid in the flow path while the first flow path is in continuing, direct communication with the vascular system of the human subject and the controller adapted to control the blood treatment device in response to signals from the microelectromechanical sensor—in combination with all the other limitations of claim 34. See applicant’s arguments of pages 17-19 concerning Mian.

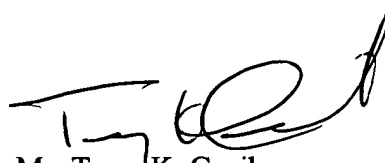

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
